

Barn Walls

Full “Hanger” Headboard Installation Guide

Thank you for purchasing a Barn Walls headboard. For your convenience, we have included 6 nails and hooks which can hold up to 20 lbs each.

1. **Preview your headboard** - Determine where to position each panel before hanging - Lay them on the floor facing up or lean them on the wall together to preview how it will look once assembled. For “Mix” color designs, skip to #2.
2. The “Mix” color designs will be marked with a number on the back and must be arranged from left to right. Panel number 1 is the first panel on the left of the bed.
3. It’s recommended to first hang the middle panel and then work your way sideways.
